SUMMARY

Computer Science student at BINUS University with hands-on experience in game development, graphic design, and machine learning research. Developer of Close Enough Colony, an indie game built in Godot and released on itch.io, looking for a software or game development internship.

EDUCATION

Bina Nusantara University – Bachelor of Computer Science (Alam Sutera) 2024 – Present
Relevant Coursework: Artificial Intelligence, Object Oriented Programming, Data Structures, Algorithm Design & Analysis, Database Technology, Software Engineering, Computer Networks, Game Design, User Experience, Extended Reality, Multimedia Systems, Research Methodology, Computational Biology.

In Progress (Semester 5): Game Programming, Computer Graphics, Compilation Techniques, Web Programming, Operating Systems, Venture Creation.

SMK Katolik Santa Maria – Pontianak 2021 – 2024

EXPERIENCE

Intern – Giant Palace, Pontianak Jul 2023 – Sep 2023
Printing & merchandise studio

- Designed and produced print and merchandise artwork, including banners, booklets, and custom product designs such as personalized pens and red envelopes.
- Finished physical products by applying custom prints to tote bags, shirts, and mugs.

PROJECTS & RESEARCH

Close Enough Colony – Indie Idle Game (Godot 4.7, HTML5) bonebit.itch.io/close-enough-colony

- Designed, built, and released a cozy idle colony sim on itch.io, playable in the browser, where a scarecrow foreman runs the colony while the player is away.
- Built 8 critter types with terrain bonuses, scouting for new land, buildings and critter training, up to 12 hours of offline progress with a foreman report on return, a guided tutorial, and browser autosave.

Chi Matcha – Mobile Ordering App (User Experience course, group project) Figma, Android (Java)

- Designed the UI/UX of a matcha cafe ordering app in Figma, from wireframes to prototype, then built it as an Android app in Java.
- Implemented login and register with validation, menu browsing with item details, order customization (ice and sugar level), and a branch location page.

Waste Classification System – Machine Learning Research (COMP6696, group project) Published

- Trained an EfficientNet-B0 image classifier on the TrashNet dataset, reaching 94% accuracy.
- Published the results as an IEEE paper with an accompanying research poster.

SII as a Prognostic Marker in DLBCL – Systematic Review & Meta-Analysis Completed

- "An Accessible CBC-Derived Prognostic Marker for Diffuse Large B-Cell Lymphoma: A Meta-Analysis of the Systemic Immune-Inflammation Index."
- Assessed pretreatment SII as a low-cost prognostic marker in DLBCL.

SKILLS

Programming Languages: Python, JavaScript, C++, Java, C, C#

Frameworks & Game Engines: Godot, Unity, Vue.js, FastAPI

Data & Machine Learning: MariaDB/MySQL, ChromaDB, machine learning frameworks

Design: Figma, Canva, print & merchandise design

Other: Android AR (ARCore), LaTeX
